# Computers & Structures

An  
International  
Journal

## Editors

**K. J. Bathe**  
M.I.T., Cambridge  
MA, USA

**B. H. V. Topping**  
Heriot-Watt University  
Edinburgh, UK

## Editorial Advisory Board

**N. Akkas**  
Middle East Technical  
University, Ankara, Turkey

**S. N. Atluri**  
Georgia Institute of  
Technology, Atlanta, USA

**I. Babuska**  
University of Texas, Austin,  
USA

**J. L. Batoz**  
University of Technologie  
Compiègne, Compiègne,  
France

**T. Belytschko**  
Northwestern University,  
Evanston, USA

**N. Bicanic**  
University of Glasgow,  
Glasgow, UK

**R. de Borst**  
Delft University of  
Technology, Delft, The  
Netherlands

**F. Brezzi**  
Palazzo del Università, Pavia,  
Italy

**M. Bucalem**  
Escola Politecnica da  
Universidade, Sao Paulo,  
Brazil

**J. W. Bull**  
University of Newcastle upon  
Tyne, Newcastle upon Tyne,  
UK

**Gangdong Cheng**  
Dalian University of  
Technology, Dalian, China

**Y. K. Cheung**  
University of Hong Kong,  
Hong Kong

**C. Cinquini**  
Univerita degli Studi di Pavia,  
Pavia, Italy

**M. Crisfield**  
Imperial College, London, UK

**C. S. Desai**  
University of Arizona, Arizona,  
USA

**E. N. Dvorkin**  
Fundacion para el Desarrollo  
Tecnologico, Buenos Aires,  
Argentina

**D. Frangopol**  
University of Colorado at  
Boulder, Boulder, USA

**W. E. Habashi**  
Concordia University,  
Montreal, Canada

**P. Hajela**  
Rensselaer Polytechnic  
University, Troy, USA

**E. Hinton**  
University College of Wales,  
Swansea, UK

**T. J. R. Hughes**  
Stanford University, Stanford,  
USA

**A. Kaveh**  
Institut für Allgemeine  
Mechanik, Vienna, Austria

**M. Kawahara**  
Chuo University, Tokyo,  
Japan

**M. Kleiber**  
Polish Academy of Sciences,  
Warsaw, Poland

**W. K. Liu**  
Northwestern University,  
Evanston, USA

**H. A. Mang**  
Technical University of  
Vienna, Vienna, Austria

**J. L. Meek**  
University of Queensland,  
Queensland, Australia

**U. Meissner**  
Technische Hochschule  
Darmstadt, Darmstadt,  
Germany

**C. A. Mota Soares**  
The Technical University of  
Lisbon, Lisboa, Portugal

**Z. Mroz**  
Polish Academy of Sciences,  
Warsaw, Poland

**A. K. Noor**  
University of Virginia,  
Hampton, USA

**R. Ohayon**  
CNAM, Paris, France

**D. R. J. Owen**  
University of Wales, Swansea,  
UK

**M. Papadrakakis**  
National Technical University,  
Athens, Greece

**M. N. Pavlovic**  
Imperial College of Science  
and Technology, London, UK

**E. Ramm**  
Universität Stuttgart, Stuttgart,  
Germany

**J. N. Reddy**  
Texas A&M University, Texas,  
USA

**E. Riks**  
Technical University of Delft,  
Delft, The Netherlands

**B. Schrefler**  
Università di Padova, Padova,  
Italy

**M. S. Shephard**  
Rensselaer Polytechnic  
Institute, Troy, USA

**H. Stein**  
University of Hannover,  
Hannover, Germany

**A. B. Templeman**  
University of Liverpool,  
Liverpool, UK

**G. Thierauf**  
University of Essen, Essen,  
Germany

**N. P. Weatherill**  
University College of  
Swansea, Swansea, UK

**N.-E. Wiberg**  
Chalmers University of  
Technology, Göteborg,  
Sweden

**P. Wriggers**  
Technische Hochschule  
Darmstadt, Darmstadt,  
Germany

**W. Wunderlich**  
Technische Universität  
München, München, Germany

**G. Yagawa**  
University of Tokyo, Tokyo,  
Japan

**Production Editor:** Susan Li, e-mail: s.li@elsevier.co.uk

**Publishing and Advertising Offices:** Elsevier Science Regional Sales Office, Customer Support Department, 655 Avenue of the Americas, New York, NY 10010, U.S.A., or Elsevier Science Ltd, The Boulevard, Langford Lane, Kidlington, Oxford OX5 1GB, U.K.

**Published semi-monthly (four volumes 1997)**

### Annual subscription rates (1997)

Annual Institutional Subscription Rates 1997: Europe, The CIS and Japan, 5564.00 Dutch Guilders. All other countries, US\$3434.00. Associated Personal Subscription rates are available on request for those whose institutions are library subscribers. Dutch Guilder prices exclude VAT. Non-VAT registered customers in the European Community will be charged the appropriate VAT in addition to the price listed. Prices include postage and insurance and are subject to change without notice. For orders, claims and product enquiries (no manuscript enquiries), please contact the Customer Support Department at the Regional Sales Office nearest to you: **The Americas:** Elsevier Science, Customer Support Department, 655 Avenue of the Americas, New York, NY 10010, USA [Tel: (1) 212-633-3730. Toll Free number for North American customers: 1-888 4ES-INFO. Fax: (1) 212-633-3680. E-mail: usinfo-f@elsevier.com]. **Japan:** Elsevier Science Customer Support Department, 9-15 Higashi-Azabu 1-chome, Minato-ku, Tokyo 106, Japan [Tel: (81) 3 5561-5033. Fax: (81) 3 5561-5047. E-mail: kyf04035@nifty.or.jp]. **Asia Pacific (excluding Japan):** Elsevier Science (Singapore) Pte Ltd, No. 1 Temasek Avenue, 17-01 Millenia Tower, Singapore 039192. [Tel: (65) 434-3727. Fax: (65) 337-2230. E-mail: asiainfo@elsevier.com.sg]. **Rest of the World:** Elsevier Science Customer Service Department, PO Box 211, 1001 AE Amsterdam, The Netherlands. [Tel: (31) 20-485-3757. Fax: (31) 20-485-3432. E-mail: nlinfo-f@elsevier.nl].

PERIODICALS POSTAGE PAID AT NEWARK, NEW JERSEY AND ADDITIONAL ENTRY POINTS. *Computers & Structures* (ISSN 0045-7949) is published semi-monthly, two issues per month January to December in four volumes, by Elsevier Science Ltd, The Boulevard, Langford Lane, Kidlington, Oxford OX5 1GB, U.K. The annual subscription in the U.S.A. is \$3434. *Computers & Structures* is distributed by Mercury Airfreight International Ltd, 10 Camptown Road, Irvington, NJ 07111-1105. POSTMASTER: Please send address corrections to *Computers & Structures*, c/o Elsevier Science Regional Sales Office, Customer Support Department, 655 Avenue of the Americas, New York, NY 10010, U.S.A.

# LIST OF CONTENTS

## NUMBER 1

	iii	Editorial
<b>A. Selmane and A. A. Lakis</b>	1	Dynamic analysis of anisotropic open cylindrical shells
<b>M. Pastor, M. Quecedo and O. C. Zienkiewicz</b>	13	A mixed displacement-pressure formulation for numerical analysis of plastic failure
<b>J. E. Locke</b>	25	Thermal-mechanical stress analysis of inhomogeneous antisymmetric cross-ply laminates
<b>Dong Ku Shin</b>	35	Large amplitude free vibration behavior of doubly curved shallow open shells with simply-supported edges
<b>Pankaj and N. Bićanić</b>	51	Detection of multiple active yield conditions for Mohr-Coulomb elasto-plasticity
<b>O. K. Bedair</b>	63	Analysis of stiffened plates under lateral loading using sequential quadratic programming (SQP)
<b>M. E. Stavroulaki, G. E. Stavroulakis and B. Leftheris</b>	81	Modelling prestress restoration of buildings by general purpose structural analysis and optimization software, the optimization module of MSC/NASTRAN
<b>Y. Özçelikörs, M. H. Omurtag and H. Demir</b>	93	Analysis of orthotropic plate-foundation interaction by mixed finite element formulation using Gâteaux differential
<b>I. Takewaki</b>	107	Efficient optimal frequency design of elastically supported distributed-parameter cantilevers
<b>Chongbin Zhao, G. P. Steven and Y. M. Xie</b>	119	Effect of initial nondesign domain on optimal topologies of structures during natural frequency optimization
<b>A. Rogovoy and B. Ivanov</b>	133	Displacement formulation of the friction conditions on the contact surface
<b>C. P. Pantelides and Shyh-Rong Tzan</b>	141	Optimal design of dynamically constrained structures
<b>Jianguo Wang and K. Schweizerhof</b>	151	Free vibration of laminated anisotropic shallow shells including transverse shear deformation by the boundary-domain element method
<b>N. Tutuncu and M. Ozturk</b>	157	Bending stresses in composite spherical shells under axisymmetric edge-loads
<b>A. Tabiei and G. Simites</b>	165	Imperfection sensitivity of shear deformable moderately thick laminated cylindrical shells

<b>Jaw-Ren Lin</b>	175	Static characteristics of rotor bearing system lubricated with couple stress fluids
<b>W. J. Watkins, D. Kennedy and F. W. Williams</b>	185	Efficient parallel Gauss–Doolittle matrix triangulation
<b>G. H. Lim</b>	197	On the conveying velocity of a vibratory feeder
<b>H. Matsunaga</b>	205	Buckling instabilities of thick elastic plates subjected to in-plane stresses

## NUMBER 2

<b>Huiyu Xue</b>	215	A combined finite element–Riccati transfer matrix method in frequency domain for transient structural response
<b>Datong Song, Suhuan Chen and Xiaoniu Li</b>	221	Selection of structural parameters for correcting frequency random errors
<b>Hsin-Chu Chen and V. Byreddy</b>	227	Solving plate bending problems using finite strips on networked workstations
<b>M. Walker, T. Reiss and S. Adali</b>	237	Multiobjective design of laminated cylindrical shells for maximum torsional and axial buckling loads
<b>Ping Liang, Su Huan Chen and Cheng Huang</b>	243	Moore–Penrose inverse method of topological variation of finite element systems
<b>M. F. Green and D. Cebon</b>	253	Dynamic interaction between heavy vehicles and highway bridges
<b>Y. Chen</b>	265	Assessment on pile effective lengths and their effects on design—I. Assessment
<b>Y. Chen</b>	287	Assessment on pile effective lengths and their effects on design—II. Practical applications
<b>S. Tolun</b>	313	Safety factors of beams subjected to pure bending
<b>A. A. Yazdani, A. Gakwaya and G. Dhett</b>	317	<i>A posteriori</i> error estimator based on the second derivative of the displacement field for two-dimensional elastic problems
<b>M. A. Shayanfar, A. Kheyroddin and M. S. Mirza</b>	339	Element size effects in nonlinear analysis of reinforced concrete members
<b>K. Kormi, D. C. Webb and W. Johnson</b>	353	The application of the FEM to determine the response of a pretorsioned pipe cluster to static or dynamic axial impact loading
<b>B. Fallahi</b>	369	An enhanced computational scheme for the analysis of elastic mechanisms

- D. E. Barker and S. A. Lantz** 373 Automating node and element assignments on conforming four-sided sections defining a domain for mapping quadrilateral elements
- Min Yu, Zhong-Sheng Liu and Da-Jun Wang** 381 Comparison of several approximate modal methods for computing mode shape derivatives
- S. S. A. Ghazi, F. A. Barki and H. M. Safwat** 395 Free vibration analysis of penta, hepta-gonal shaped plates

#### *Technical Notes*

- K. D. Pithia, S. Chen and W. C. Lau** 409 An alternative view of building structures
- L. S. Ong and G. Lu** 413 Simply-supported plate subject to loads distributed over an arbitrarily shaped area

#### NUMBER 3

- Y. Y. Zhu, T. Zacharia and S. Cescotto** 417 Application of fully automatic remeshing to complex metal-forming analyses
- In-Won Lee and Gil-Ho Jung** 429 An efficient algebraic method for the computation of natural frequency and mode shape sensitivities—part I. Distinct natural frequencies
- In-Won Lee and Gil-Ho Jung** 437 An efficient algebraic method for the computation of natural frequency and mode shape sensitivities—part II. Multiple natural frequencies
- R. Artan** 445 The analytical calculation of circular rods of variable cross-section by the initial values method
- R. M. V. Pidaparti** 463 Microdamage simulation in a bone tissue using finite element analysis
- B. Tabarrok and Z. Qin** 467 Dynamic analysis of tension structures
- V. Yildirim** 475 A computer program for the free vibration analysis of elastic arcs
- S. K. Bose and S. C. Das** 487 Nonlinear finite element analysis of stresses and deformations beneath rigid footings
- V. A. Oven, I. W. Burgess, R. J. Plank and A. A. Abdul Wali** 493 An analytical model for the analysis of composite beams with partial interaction
- J. W. Langelaan and E. Livne** 505 Analytic sensitivities and design oriented structural analysis for airplane fuselage shape synthesis
- J. A. Masad** 521 Optimization methods with structural dynamics applications

<b>Sung-Kie Youn and Sang-Hoon Park</b>	<b>527</b>	A study on the shape extraction process in the structural topology optimization using homogenized material
<b>K. Vijayaraghavan and K. S. Surana</b>	<b>539</b>	$p$ -Version least-squares finite element formulation of a system of convection-reaction nonlinear equations—fixed bed $\sigma$ -xylene oxidation
<b>Chang-New Chen</b>	<b>555</b>	The two-dimensional frame model of the differential quadrature element method
<b>Shu H. Peng and Wenji V. Chang</b>	<b>573</b>	A compressible approach in finite element analysis of rubber-elastic materials
<i>Technical Note</i>		
<b>N. G. Sarigul</b>	<b>595</b>	Parametric studies on vertical boundary location in dynamic finite element analyses
<b>NUMBER 4</b>		
<b>Suqin Wang, R. C. Ertekin and H. R. Riggs</b>	<b>603</b>	Computationally efficient techniques in the hydro-elasticity analysis of very large floating structures
<b>Qi-Lin Zhang and U. Peil</b>	<b>611</b>	Random finite element analysis for stochastic responses of structures
<b>E. C. Oguejiofor and M. U. Hosain</b>	<b>617</b>	Numerical analysis of push-out specimens with perfobond rib connectors
<b>R. Suresh and S. K. Malhotra</b>	<b>625</b>	Some studies on static analysis of composite thin-walled box beam
<b>J. H. Chang and L. P. Pu</b>	<b>635</b>	A finite element approach for $J_2$ calculation in anisotropic materials
<b>S. M. Yang and S. M. Tsao</b>	<b>643</b>	Dynamics of a pretwisted blade under nonconstant rotating speed
<b>E. S. B. Reddy, M. O'Reilly and D. Chapman</b>	<b>653</b>	A software to predict the behaviour of tension piles
<b>B. F. Song</b>	<b>659</b>	A technique for computing failure probability of a structure using importance sampling
<b>O. U. Onyemelukwe, M. A. M. Torkamani and H. R. Bosch</b>	<b>667</b>	Numerical simulation of wind-induced forces on bridge deck sections of long-span bridges
<b>N. Manoharan and S. P. Dasgupta</b>	<b>681</b>	Collapse load computation for high-friction soil
<b>Shih-Ming Yang</b>	<b>685</b>	Stability analysis of linear structural control systems with noncollocated feedback

- M. Rahman** 691 The stress intensity factor for a circular crack in an infinitely long cylinder of an inhomogeneous material under axial loading: a simplified approach
- T.-P. Chang and M.-H. Wu** 699 On the use of characteristic orthogonal polynomials in the free vibration analysis of rectangular anisotropic plates with mixed boundaries and concentrated masses
- D. Satish Kumar, C. Sujatha and N. Ganesan** 715 Disc flexibility effects in rotor bearing systems
- V. Ramamurti and R. Karthikeyan** 721 Stress analysis of taper locks
- Xiaodong Luo and R. V. Grandhi** 737 ASTROS for reliability-based multidisciplinary structural analysis and optimization
- A. N. Bercin** 747 Analysis of energy flow in thick plate structures
- Byung Woo Lee and O Kaung Lim** 757 Design sensitivity analysis extended to perturbation treatment in problems of uncertain structural system
- Lee Xingde** 763 Temperature calculation in the thickness direction for composite of arbitrary layers
- M. Serra** 771 Approximated calculus of torsional rigidity of beams with solid cross-section
- A. E. Anuta Jr** 775 The mode shape reversal with viscous damping
- Technical Note*
- E. Romanelli and P. A. A. Laura** 795 An approximate method for analyzing transverse vibrations of circular, annular plates of non-uniform thickness and a free inner boundary

## NUMBER 5

- F. Trochu and Yuan-Yao Qian** 799 Nonlinear finite element simulation of superelastic shape memory alloy parts
- J. Ari-Gur and I. Elishakoff** 811 Dynamic instability of a transversely isotropic column subjected to a compression pulse
- W. J. Liou** 817 Impact analysis of laminated composite plates with statical indentation laws
- B. B. Budkowska and C. Szymczak** 831 Initial post-buckling behavior of piles partially embedded in soil
- F. Fraternali and G. Bilotti** 837 Nonlinear elastic stress analysis in curved composite beams

<b>J. Atkočiūnas, A. Norkus and L. Rimkus</b>	<b>861</b>	Distortion in mechanics of elastic and elastic-plastic frames
<b>M. Isreb</b>	<b>865</b>	Superheater minimum stress unit start-up option of coal-fired power plants
<b>Jian-Jun Chen, Bao-Yan Duan and Yu-Geng Zeng</b>	<b>877</b>	Study on dynamic reliability analysis of the structures with multidegree-of-freedom
<b>D. Wang, M. R. Chowdhury and A. Halder</b>	<b>883</b>	System reliability evaluation considering strength and serviceability requirements
<b>Ş. Yüksel and M. Gürgöze</b>	<b>897</b>	On the flexural vibrations of elastic manipulators with prismatic joints
<b>N. Siva Prasad and C. J. Rajagopal</b>	<b>909</b>	Effect of node placement algorithm on adaptive mesh generation
<b>G. Sinha and M. Mukhopadhyay</b>	<b>919</b>	Static, free and forced vibration analysis of arbitrary non-uniform shells with tapered stiffeners
<b>A. K. Soh, C. K. Soh and L. P. Pey</b>	<b>935</b>	On the compatibility conditions for modeling tubular joints using different types of elements

#### NUMBER 6

<b>A. A. El Damatty, R. M. Korol and F. A. Mirza</b>	<b>943</b>	Large displacement extension of consistent shell element for static and dynamic analysis
<b>M. Dicleli</b>	<b>961</b>	Computer-aided optimum design of steel tubular telescopic pole structures
<b>Hyo-Jin Kim</b>	<b>975</b>	Postbuckling analysis of composite laminates with a delamination
<b>J. M. Dickens, J. M. Nakagawa and M. J. Wittbrodt</b>	<b>985</b>	A critique of mode acceleration and modal truncation augmentation methods for modal response analysis
<b>W. J. Liou</b>	<b>999</b>	Stress distributions of short fiber composite materials
<b>A. Paolozzi and I. Peroni</b>	<b>1013</b>	A procedure for the determination of effective mass sensitivities in a general tridimensional structure
<b>A. Ergin</b>	<b>1025</b>	The response behaviour of a submerged cylindrical shell using the doubly asymptotic approximation method (DAA)
<b>Jeha Ryu, Sang-Sup Kim and Sung-Soo Kim</b>	<b>1035</b>	A criterion on inclusion of stress stiffening effects in flexible multibody dynamic system simulation
<b>B. Hučko and L. Faria</b>	<b>1049</b>	Material model of metallic cellular solids

**Zefang Xu and  
A. Mirmiran**

**1059** Looping behavior of arches using corotational finite element

**P. M. Wung**

**1073** Laminated composite structures by continuum-based shell elements with transverse deformation
